

# Get your sports team ready for game time.

Organizing a sports team can feel like managing chaos, but Office Live Workspace beta can help keep your squad in line. It gives coaches, players, and even parents one convenient place to find the latest schedules, get directions to games, update team stats, and more.

### 1. Create a workspace for your team

The "Sports Team" workspace template can help you create a roster, schedules, an announcement board, and a snack sign-up.

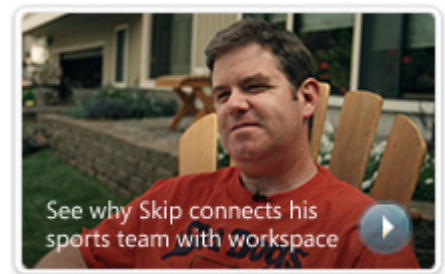

### 2. Add your existing files

Your workspace is an ideal place to store files that you need quick access to, such as rulebooks, driving directions, or contact information.

### 3. Share your workspace

A team workspace makes it easy for everyone to view schedules, maintain their statistics, or see rainout information.

See why Skip connects his sports team with workspace

*"I get compliments back from others that this is the simplest to use."*
